

USABILITY TEST TEMPLATE

1-Introduction: brief definition of the system:

A simple taxi advertising website is a platform where taxi service providers can post their offerings, such as availability, pricing, and contact information, to connect with potential customers. This type of website typically includes features like a list of taxi ads, search or filter options, and basic forms for users to add or view advertisements. It focuses on ease of use and does not usually require complex functionalities like live tracking or online payments.

2-Users: Demographics about recruited users (3 kullanıcının demografik özellikleri-yaş, cinsiyet, meslek vb)

User 1:

Name: Buse

Age: 21

Gender: Female

Occupation: Student

User 2:

- **Name:** Merve
- **Age:** 23
- **Gender:** Female
- **Occupation:** Student

User 3:

- **Name:** Hatice
- **Age:** 22
- **Gender:** Female
- **Occupation:** Student

3-Tasks: use cases which included the usability test

1-Add a new taxi ad

2-View existing taxi ads

4-Method: Test procedure, environment, recording method, explanation to users (test sırasında kullanıcılara verilen açıklama ve yönergeler)

Test environment: Users performed the tests on their own computers.

Test procedure: Users were given instructions to complete the tasks mentioned above, and the process was recorded.

Recording method: Users' processing times and errors were observed and noted.

Explanation: Users were informed about the purpose and usage of the system before the test, and they were informed about the process.

5. Results:

task completion status (görevleri başarma durumu), error rate,
task completion time distribution accross users (görev tamamlama süreleri-saniye),
satisfaction questionnaire result (sisteme yönelik memnuniyetini ölçen anket uygulayın)

Task Completion Status:

User 1: 2/2 tasks completed

User 2: 1/2 tasks completed

User 3: 1/2 tasks completed

Task Completion Times:

User 1: Average 35 seconds

User 2: Average 50 seconds

User 3: Average 70 seconds

Satisfaction Survey Results:

Survey results rated from 1 to 5:

User 1: 4.5

User 2: 4.0

User 3: 3.5

6. Conclusion

Identified Problems and Solutions:

Problem 1: User 3 could not complete the "Add taxi ad" process. Since the mandatory fields were not specified in the ad add form, no error message was received when missing information was entered.

Solution: (*) sign can be added to the mandatory fields in the form.

Problem 2: User 2 could not view all taxi ads when he logged in to the site.

Solution: A page listing all ads was added.

As a result, the errors detected as a result of the test were fixed and the user experience of the system was improved.
